S.M.ART - Our state-of-the-art modular kitchens provide comfort, ease, and elegant living.

Products That Are More In Demand and Why?

Our range of pre-hung doors Eliziio is a premium offering and trending globally. We produce phenomenal pre-hung doors that make a smarter and sturdier addition than the typical doors.

■ As pre-hung doors are factory installed, their elegance is not impaired while being fixed.

■ One of the biggest benefits of a pre-hung door is that it will save you time because its installation is fairly simple.

■ Pre-hung doors are weather-resistant and can withstand wear and tear for much longer than typical doors. Thanks to their core and fine

quality material, they can hold off the harshest of environmental changes.

■ In case your pre-existing door is damaged or needs repair, a pre-hung door is much more convenient, cost-efficient, at the same time its installation is far easier.

■ Pre-hung doors often have a layer of protective material that prevents them from termites.

■ The quality materials used in the pre-hung doors' solid core interiors, as well as exteriors, are excellent in resisting environmental damage. They don't swell up after absorbing moisture or show signs of early wear and tear.

Key Priorities

Our vision is to make India the global hub for world-class solutions in woodcraft design and engineering. Also, inspired by the Indian values, reset the benchmark of excellence, and serve beyond the needs, in India as well as the global market.

What are Future Plans?

We meet the needs of diverse segments like commercial projects, residential projects, corporate offices, five star hotels, malls, and hospitals to name a few. But we are catering more to Indian clients at present. We hope to achieve the same pathbreaking success by showcasing our brilliance to offshore clients based out of five continents including Asia, Africa, Europe, North America, & South America.

We also welcome the representatives of overseas firms who seek to initiate collaboration with us. Tie up with us for joint ventures, we have an incredibly strong infrastructure and capacity to serve globally. We are seeking more partners to export our products to their markets
