

## WEINZIERL ENGINEERING GmbH

We develop intelligent software and hardware components for building system technology. Our focus is on building networking based on the **KNX standard**.

### KNX IP BAOS 777

With the KNX IP BAOS 777 Weinzierl presents the most powerful platform of the reliable BAOS series. The device is configured via the ETS and offers increased performance over previous KNX IP BAOS devices. The unit offers logging and also logic and timing functions. It features a built-in web server for simple visualization via a web browser running on a PC or mobile device.

The KNX IP BAOS 777 it is suitable for connecting numerous applications over IP to KNX ETS each with an individual data-base entry. A free SDK is available for the BAOS protocol.
