# SILICA EPOXY MATERIALS

## Silica Epoxy Primer EP

- + Two component epoxy flooring primer.
- + Very good anti-corrosion coating durability, high protective and insulating properties.

## Silica Epoxy Mortar- 01

- + Consists of 3 parts and is an effective correcting agent for epoxy floors that treats all cracks and gives an equal level as required.
- + Used to treat large holes and cracks in concrete slab.

## Silica SL

- + Two-components, hard-wearing floor screed which provide a number of unique properties such as being high gloss, visually pleasing, easy to clean and with hygienic screed that has excellent chemical resistance.

## Silica STU 01

- + A great solution for cracks or holes in drywall, plaster, and wood.
- + Perfect for filling nail holes, screw holes.

## Silica FC

- + High-Build epoxy coating.
- + Used for high foot traffic and light to moderate forklift traffic areas where abrasion resistance is required.

## SILICA SEALERS

### Silica Sealer WB

- + Water based penetrating Sealer - Hydrophobic Impregnation.
- + Provides a cost-effective solution for protecting substrates from water and the elements.
- + Excellent water repellence.
- + Penetrates deeply into new or existing concrete or masonry for maximum protection against water penetration, chloride ion attack, freeze and weathering.

### Silica Sealer SB

- + Solvent-based methyl methacrylate floor sealer for concrete and decorative floors.
- + Beautifies the look of the surface and gives a new appearance.
- + Fast solvent release.
- + UV Resistant.

### Silica Waterproofing WP 01

- + Two-parts polymer modified cementitious waterproof mortar.
- + Waterproof mortar slurry comprising of a liquid polymer and a cement-based mix.
- + Applies to concrete and mortar to prevent water infiltration.

## SILICA TILE ADHESIVES

### Silica Tile Adhesive TA -01

- + Special type of glue used to fix tiles all around the home (Grey Color).
- + Ready-made mixture made from Portland cement, polymers and selected aggregate particles with some additives added in it to improve its property for laying tiles.

### Silica Tile Adhesive TA -02

- + High performance cementitious dry set mortar (White Color ) used for fixing tiles on the walls, floors, swimming pools, etc., which may have any type of substrate such as cement, wood, glass, etc.

## Sil!CA<sup>®</sup>

- ✦ Advanced Products of Sand LLC is commercially known as “SILICA PLUS” local manufacturer established in 2019.
- ✦ Located in Sajaa Industrial Area, Sharjah Emirate UAE
- ✦ SILICA PLUS has the capacity of producing more than 70,000 MT/Year of silica sand products and 2500 m3 of liquids.
- ✦ The core business of SILICA PLUS is high quality silica raw materials including silica sand, silica flour, construction chemicals and liquid waterproofing materials.
