MISSION, VISION AND PRINCIPLES

POLYGROUP is a company **founded in 1975** by European experts of both construction and raised access floor systems. From its beginning, our company has been focused on different **raised access floor systems and covering solutions**, positioning ourselves as the number one factory in Spain in this field as well as a reference in the European market.

Our continuous investment in **R+D+i**, our strict product Quality Policy and our **great commitment with the environment** got POLYGROUP as one of the main manufacturers of raised access floor systems worldwide.

Thanks to our experience, we can nowadays offer the best consulting service to all of our clients, as well as the most advanced **technical solutions** for each project.

All support given to our company by agencies and international references strengthen our corporate identity and makes it easier for us to reach our main goal of **providing the most original and high-quality systems**.

<< **Quality means doing it right when no one is looking.** >>

- Henry Ford.

MISSION, VISION AND PRINCIPLES

POLYGROUP is defined by professionals of high qualification in their areas of expertise and they are integrated in each stage of the manufacturing process of our products.

We create work clusters inside our company depending on our ongoing projects so we can expand our scope. Furthermore, we care about maintaining an optimum environment so each and every one of our professionals can grow with the **highest quality and precision**.

HEADQUARTERS AND FACILITIES

HEADQUARTERS AND FACILITIES

EUROPE

5.000 m² – Production plant and offices. Seville, Spain.
 3.000 m² – Warehouse. Seville, Spain.
 1.000 m² – Woodwork workshop (associated company). Seville, Spain.
 200 m² - Showroom. Seville, Spain.
 80 m² – Commercial offices. Madrid, Spain.

AMERICA

120 m² – Commercial offices. Panama City, Panama.

ASIA

80 m² – Commercial offices. Hong Kong.

HEADQUARTERS AND FACILITIES

Production lines

- _ Two automated profiling and grinding lines.
- _ Bonding and pasting machinery.
- _ 8 plate hydraulic press.
- _ 6 plate hydraulic press.
- _ Semi-automatic steel embossing and stamping press.
- _ Painting application cabin.
- _ CNC.
- _ Automated electric welding machinery.
- _ Assembly, palletising and product packing lines.

Precision and Quality Control machinery

We have our own laboratory filled with machinery which is made for different testing regarding to all of our raised access floor systems: physical, mechanic, destructive, fire, temperature, moisture and fatigue (among others). They are calibrated and certified by independent Metrology.

VOLUME OF PRODUCTION

With more than 40 years of experience, our production ability has allowed us to...

Participate in:

Export to:

PROJECTS

+70
COUNTRIES

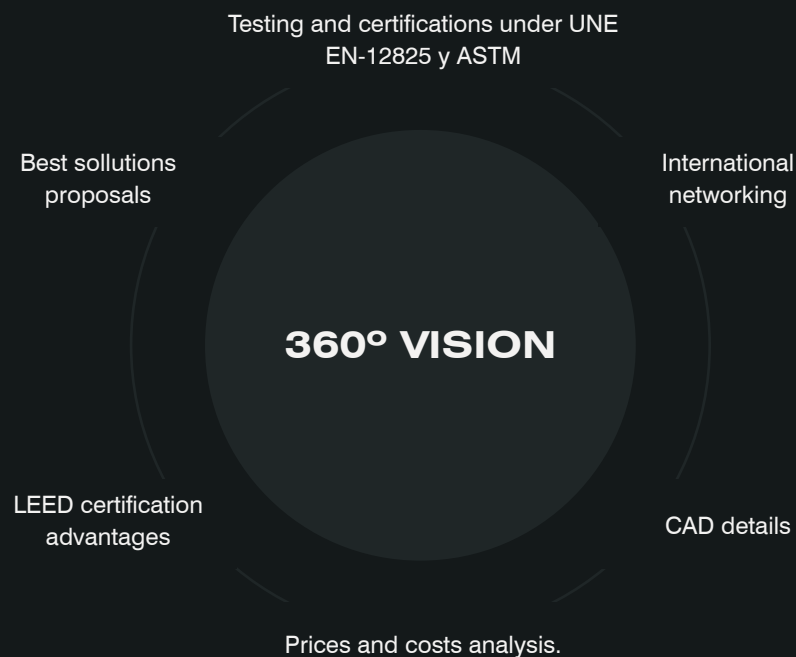

+8M
OF SQM

400.000m² per year
in terms of volume of production

MAXIMUM FLEXIBILITY

- Singular projects
- Customised solutions

TECHNICAL DEPARTMENT

We count with a professional team specialised in guiding and advising during all the specification process, no matter the project complexity nor the technical requirements that might exist.

Our continuous relation and integral assistance to engineers, architects, designers and distributors, makes us more than developers and manufacturers: we become **key collaborators**.

Some of our products certifications:

SUSTAINABLE RESPONSIBILITY

As part of our commitment with the environment, POLYGROUP takes part in the **US Green Building Council**. For this reason, we are manufacturers of raised access floor solutions that provide great value for **LEED certifications** and **energetic classifications for buildings**.

Our wide range of systems are built under the highest quality and most innovative international criteria so they can fulfill all **environmental requirements** running under the international standards.

We follow a strict process to select the best and most sustainable raw material and manufacturing process. We can offer, for all kinds of buildings, raised access floor systems that can reach the highest quality requirements with a reasonable price.

62% recyclable material after use

Use of recycled raw material

100% recycling of raw industrial waste

Water based V.O.C. free adhesive

Energy optimisation in the manufacturing process

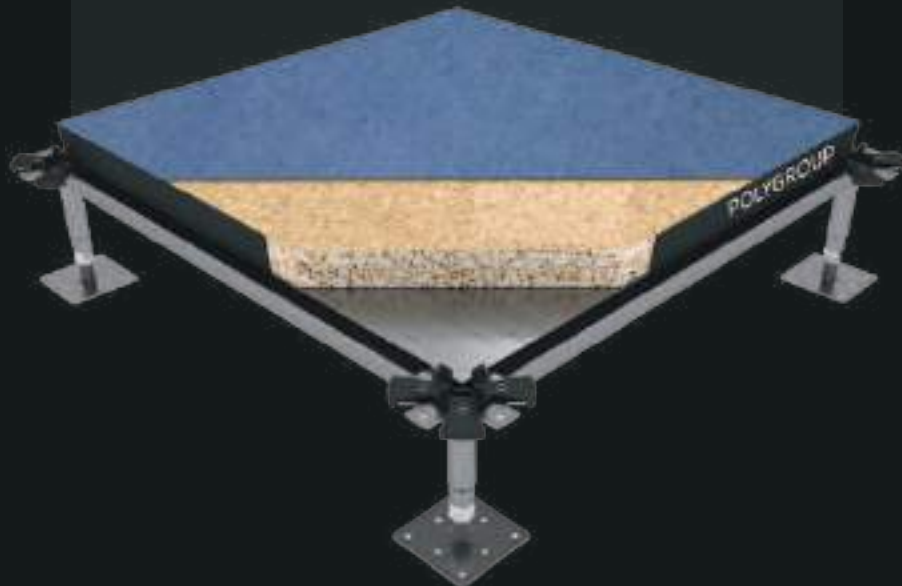

Use of 100% recycled packaging

RANGE OF PRODUCTS

GAMAFLOR PAC

High density chipboard with a bottom galvanized steel **sheet** and different thickness values. Its edge is made by a self-extinguishing plastic band and it's built with a bottom support to provide insulation from moisture and improving its mechanical performance as well as its electrical conductivity.

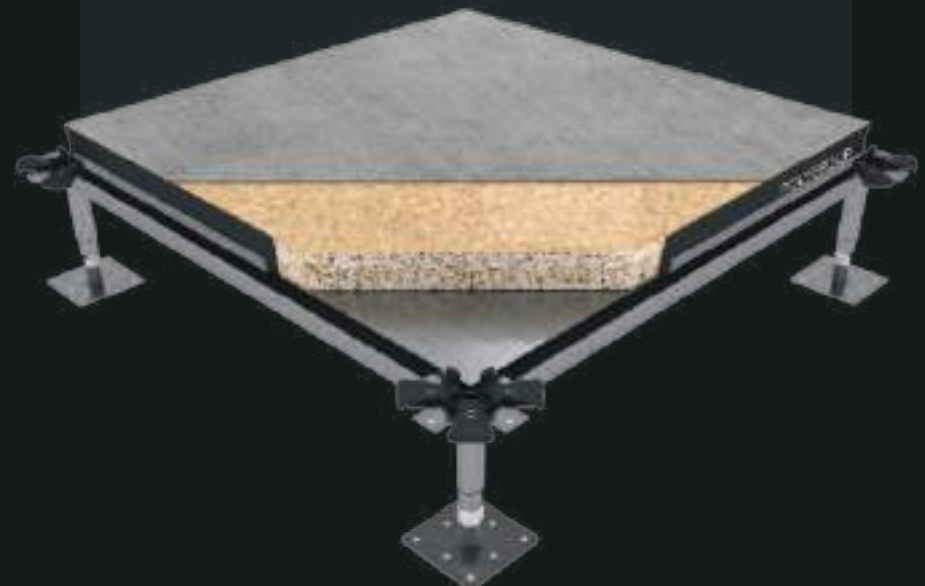

Coverings: granite, porcelain, natural wood, carpet, linoleum, antistatic HPL, HPV vinyl, ESD vinyl, conductive vinyl, rubber and others under requirement.

GAMAFLOR BANK

High density chipboard with a bottom galvanized steel **tray** and different thickness values. Its edge is made by a self-extinguishing plastic band and it's built with a bottom support to provide insulation from moisture and improving its mechanical performance as well as its electrical conductivity.

Coverings: granite, porcelain, natural wood, carpet, linoleum, antistatic HPL, HPV vinyl, ESD vinyl, conductive vinyl, rubber and others under requirement.

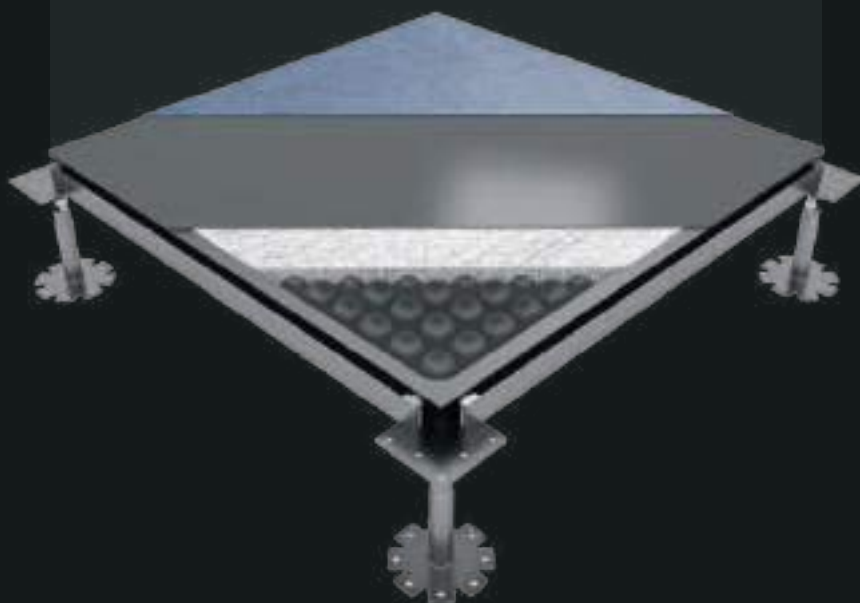

RANGE OF PRODUCTS

GAMAFLOR FULL STEEL

High density **concrete core** with galvanized steel sheets and different thickness values. They provide insulation from moisture and a mechanical performance improvement as well as great electrical conductivity.

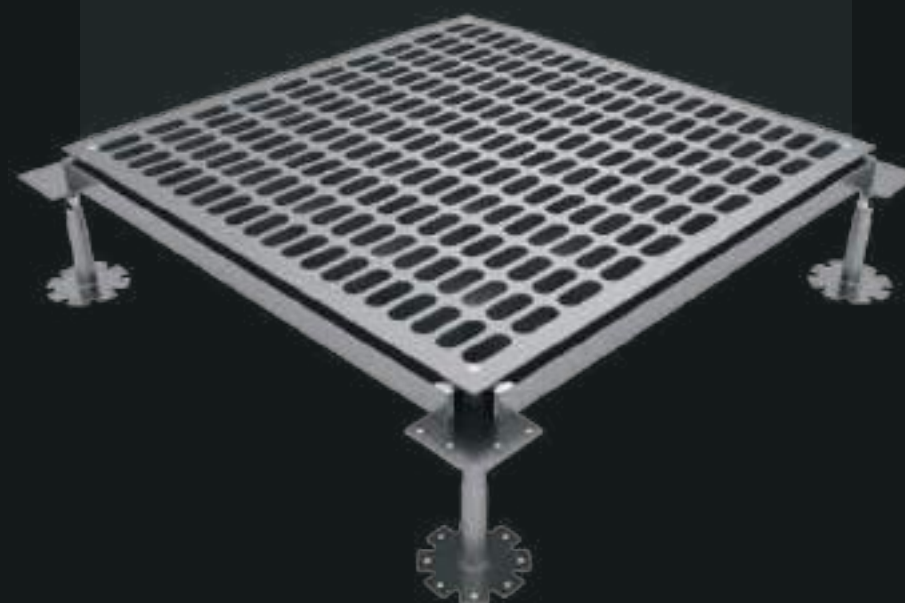

Coverings: granite, porcelain, natural wood, carpet, linoleum, antistatic HPL, HPV vinyl, ESD vinyl, conductive vinyl, rubber and others under requirement.

GAMAFLOR G SERIES

Steel galvanized **perforated panels** with different aperture percentages and finished with anti-corrosive epoxy painting.

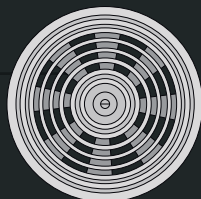

They come with directional tabs that allow air flow direction control so they can guarantee the non-presence of any vibrations and the noise reduction improvement.

SOME GAMAFLOR ACCESSORIES

AIR DIFFUSERS

For air flow regulation.
U.F.A.D. recommended.

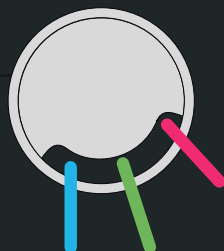

ELECTRICAL BOXES

For different kinds of connections.

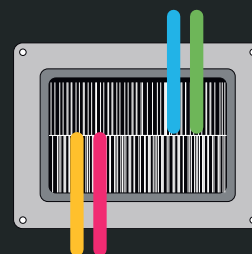

GROMMET A

Designed to support high loads.

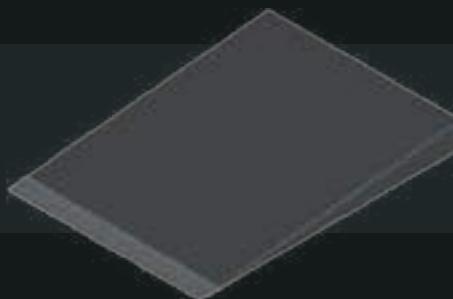

GROMMET B

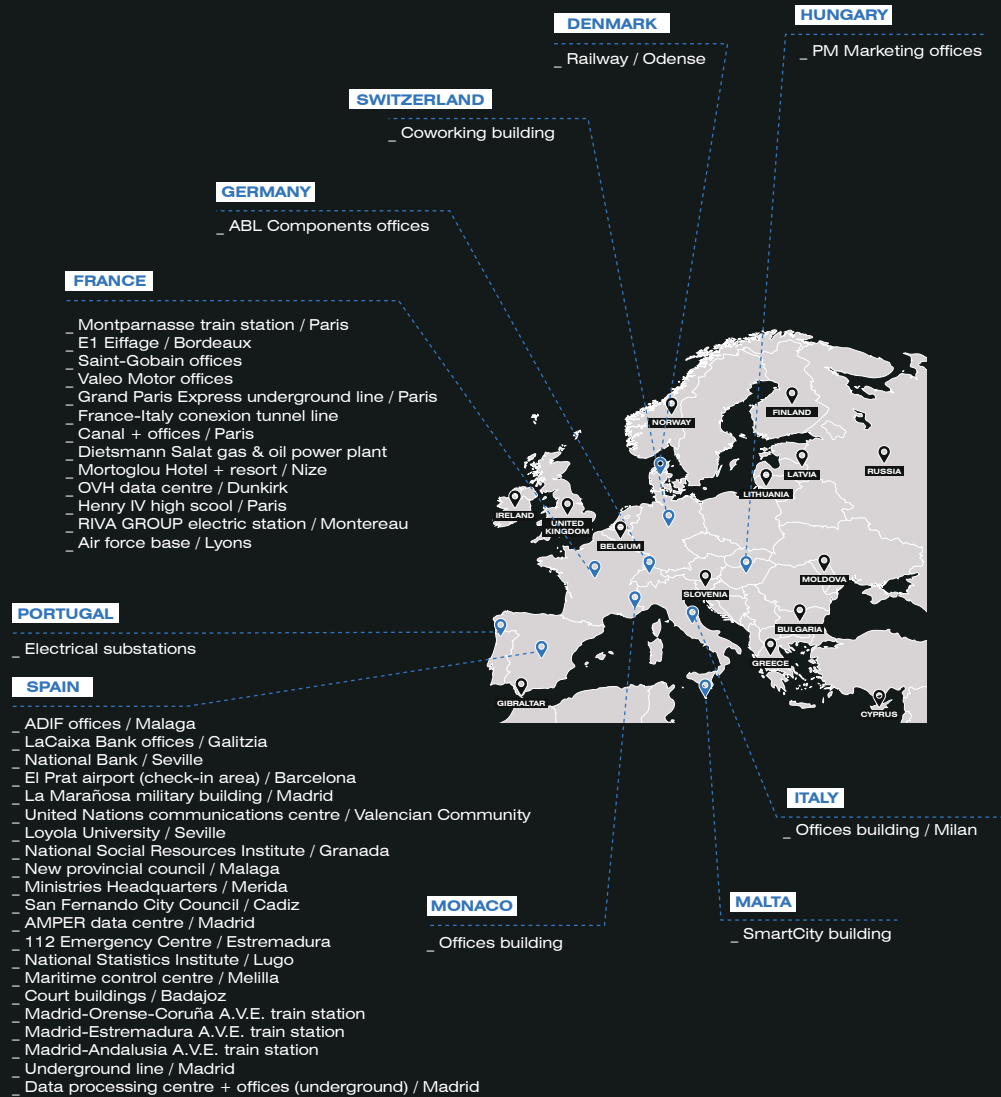

To avoid dust particles and dirt.

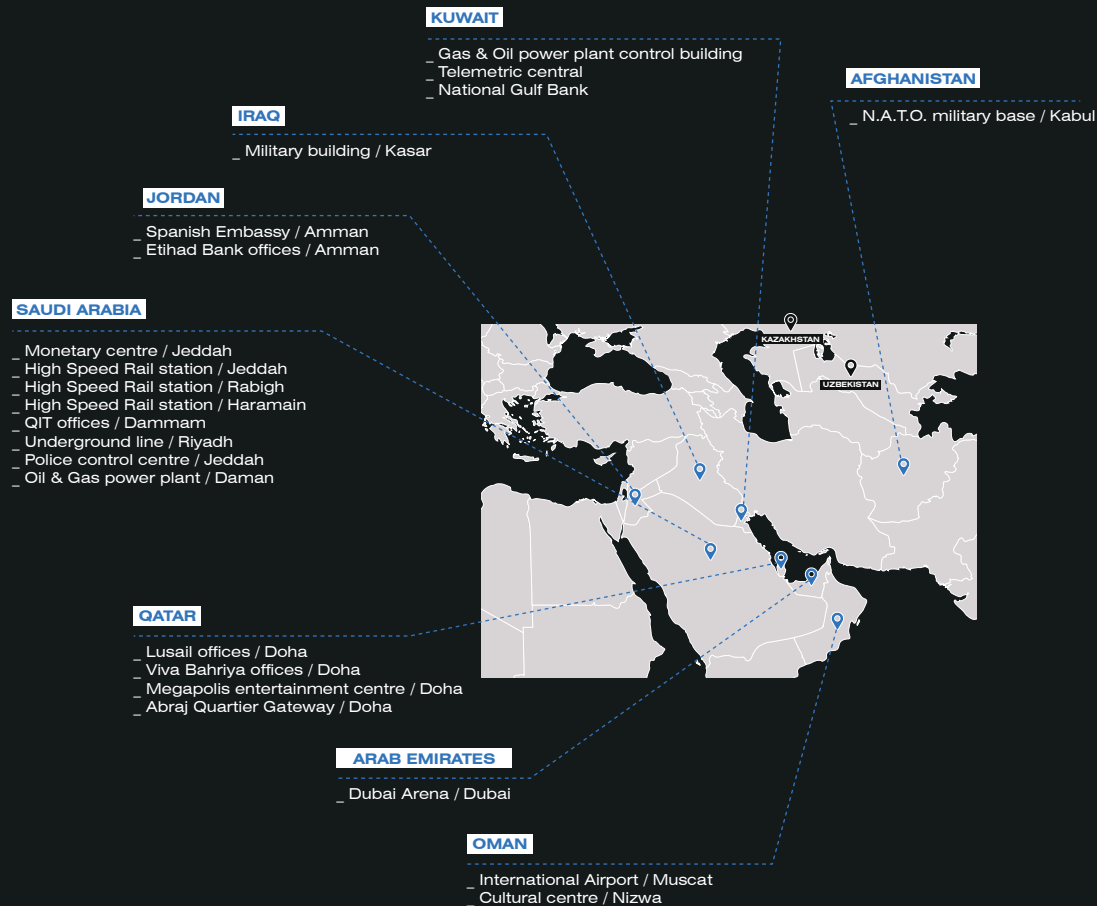

More accessories available,
like panel lifters, ramps and
stairs.
