

WHERE INNOVATION MEETS PROTECTION

Born in 2010 from the growing need to protect custom-made and high-value flooring, SupaBord is the result of innovation by Bord Industries — developed in close collaboration with leading timber flooring specialists.

Today, SupaBord stands as a trusted name in floor protection, delivering dependable performance across commercial builds, residential projects, and renovations worldwide. Designed for professionals who demand strength, reliability, and efficiency, SupaBord makes every job site cleaner, safer, and more productive.

SUSTAINABILITY: CRAFTED WITH CARE FOR OUR PLANET

At SupaBord, we believe superior protection shouldn't come at the cost of the environment. Our products are made using responsibly sourced, recycled fibres, reducing waste while maintaining exceptional strength and durability.

Every roll of SupaBord reflects our ongoing commitment to sustainable manufacturing, responsible sourcing, and continuous improvement. Even as certification standards evolve, we remain dedicated to advancing eco-friendly practices — protecting both your work and the world we build in.

PROTECTION TRUSTED BY TRADES

Every site tells a story — and too often, that story includes damaged floors, scratched finishes, and costly rework.

Without proper surface protection, even the best workmanship can be compromised in minutes. Our heavy-duty SupaBord Contractor Grade eliminates that risk.

Developed to withstand the toughest site conditions, this trade-approved product combines vapour permeability with unmatched strength and durability.

Each 30m² roll is flexible yet resilient, pre-marked for fast installation, and made entirely from 100% recycled material. It safeguards timber, concrete, and tile surfaces from impact, moisture, and debris, ensuring a flawless finish on every project.

By preventing damage and downtime, SupaBord Contractor Grade saves you time, labour, and materials — while supporting your sustainability goals.

Trusted by contractors worldwide, it's the professional's choice for confidence on every job site.

SupaBord is a proven and trusted brand to provide temporary floor protection for commercial, residential construction and renovation projects.
